

# Fact Sheet: Transit Options on Northwest Corridor Express Lanes

The State Road and Tollway Authority (SRTA) and Georgia Department of Transportation (GDOT) are finalizing the construction and testing phases of the Northwest Corridor Express Lanes to increase options and mitigate congestion for Georgia commuters traveling north of Atlanta. The Express Lanes, which add new capacity for I-75 and I-575 motorists, opened on Sept. 8, 2018.

The Northwest Corridor Express Lanes are reversible lanes that run along and through I-75 and I-575 in Cobb and Cherokee counties. The 29.7 miles of dynamically priced lanes are separated from the general purposes lanes by an elevated bridge or concrete barrier and a series of gates, offering the highest level of safety.

These new reversible toll lanes provide greater benefits with transit. Unlike the I-85 Express Lanes, transit riders and registered vanpools and registered law enforcement are the only ones who can ride for free on the Northwest Corridor Express Lanes. State-registered alternate fuel vehicles (AFVs), motorcycles and HOT3+ carpools must pay tolls on Northwest Corridor Express Lanes.

The Northwest Corridor Express Lanes are reversible lanes.
